

Student Test Scores

Student test scores are used for a variety of purposes. Placement into English and Mathematics courses depends on the score the student earned as the result of placement testing. In addition, test scores may be used to meet prerequisites for lower and upper level general education and major/minor courses. Test scores generally are the result of a nationally administered examination, prior degree or evaluation of materials specific to the student's academic history.

Occasionally, a test score will be added to indicate a student's eligibility to enroll in a course that is not related to any test, but the student's status or level. Additional information about test scores is available at <https://www.odu.edu/academics/academic-records/score-analysis>.

If you have questions about your test scores, please consult your academic advisor.
